EDUCATION

Diploma in Computer Engineering, Temasek Polytechnic Apr 2024 – Current

Completed relevant modules in:

- Computer Programming in Python
- Object Oriented Programming in Java
- Full Stack Development
- Data Visualisation & Analytics
- Artificial Intelligence & Machine Learning
- Intelligent Automation
- Internet of Things
- Microcontroller Applications

SKILLS

Technical/Domain Skills

- Skilled in Python programming and Django for developing web and data-driven applications
- Experience in Full-Stack development, including SQL databases and API testing
- Familiar in the use of version control systems such as Git and GitHub for collaborative software development
- Competent in UI/UX design, creating intuitive, user-friendly interfaces that enhance usability

Generic Skills

- Provide clear and effective solutions by being analytical and detail-oriented
- Exhibit strong teamwork and communication skills, leading to successful project completion and positive peer feedback
- Demonstrate problem-solving and system-thinking skills through designing logical program flows and efficient application architectures

WORK EXPERIENCE

Part-Time Banquet Crew, Marriott Tang Plaza Hotel Apr 2024 – Current

- Support banquet operations by setting up venues, serving guests, and ensuring smooth event flow
- Demonstrate strong teamwork and communication skills by working closely with colleagues and supervisors
- Adapt quickly to dynamic work environments while ensuring service quality
- Apply effective time management skills by balancing part-time work with academic commitments

WORK-STUDY EXPERIENCE

Singapore Museums Visitor Insight App Apr 2024 – July 2024

- Designed and implemented a Python application that generates insights on yearly museum visitor statistics in Singapore
- Received positive feedback from the tutor and achieved a Distinction in the module

Utility Billing System Oct 2024 – Feb 2025

- Collaborated with a project partner to build a Java-based Utility Billing System, featuring user registration, meter reading submission, and automated bill generation.
- Demonstrated strong teamwork, problem-solving, and Java programming skills throughout the development process.

AWARDS AND ACHIEVEMENTS

Top 10 in RoboCoder Competition, Temasek Polytechnic Nov 2024

Participated in the RoboCoder Competition, developing a line-following robot car programmed to autonomously navigate a track using sensor-based logic and embedded coding using Arduino

CO-CURRICULAR ACTIVITIES

Sub-committee member, Temasek Polytechnic International Students Group, Temasek Polytechnic April 2024 - Current

- Assisted in planning campus events and cultural exchange activities, enhancing engagement and inclusion among international students
- Coordinated communication between members and event committees, demonstrating teamwork and cross-cultural collaboration
